

Brainstorming & Idea Prioritization

Date: 30 September 2026 | Team ID: 6ab2240ffc67a5bc0222524ef | Project: ComicCraft – AI Comic Story Creator

Project idea exploration

ComicCraft addresses the gap between having a story idea and being able to turn that idea into a complete illustrated comic. The team explored ideas around AI storytelling, educational comics, social storytelling, image generation, and downloadable creative content. The selected concept combines structured story generation with panel illustration and PDF export.

Step 1 – Brainstorm and idea listing

S.No	Team member	Idea / suggestion	Category	Group
1	Jennet Mercy A	AI-assisted comic story generator	Generative AI	A
2	Prasanna P	Panel-by-panel story and dialogue creator	Storytelling	A
3	Sadana S	Automatic comic illustration from prompts	Image Generation	A
4	Sadana D	Custom tone and art-style controls	Personalization	A
5	Anushiya A	Downloadable comic PDF export	Document Export	A

Step 2 – Idea prioritization

Group	Final idea	Feasibility	Importance	Priority	Selected
A	ComicCraft: generate a five-panel illustrated comic from a user prompt	High	High	1	Yes
A	Add user-controlled character, setting, tone and art style	High	High	2	Yes
A	Preview the generated panels before export	High	High	3	Yes
A	Export the final comic as a PDF	High	High	4	Yes

Decision rationale

The selected idea has a clear user flow: prompt → structured five-panel outline → narration/dialogue → image generation → preview → PDF. It is also directly supported by the existing project modules, making the idea practical to implement and demonstrate.
