

Demonstration of Proposed Features

Date: 30 September 2026 | Team ID: 6ab2240ffc67a5bc0222524ef | Project: ComicCraft – AI Comic Story Creator

Demonstration of proposed features

Feature	Demo action	Expected visible result
Story input	Enter prompt, character, setting, tone and art style.	Form accepts the creative brief.
Generation	Submit /generate.	Comic preview page is rendered after pipeline completion.
Five-panel structure	Inspect panel titles and content.	Exactly five panels are assembled.
Illustration	Inspect generated panel images.	One image path is associated with each panel.
PDF export	Use the provided export flow.	Multi-page comic PDF is created.
JSON API	POST a PromptRequest to /generate-comic/json.	Structured JSON result contains layout/PDF information.
Image test	Call /test-image with a prompt.	Image-generation path can be tested independently.

Demo preparation

Before a live demonstration, configure required environment variables, install dependencies, verify image-generation access, and run the included pytest suite. A short sample prompt should be prepared to keep the demonstration focused.
